PABLO GHEZZI

Amherst, MA 01002 • +1 (413) 399-0490 • pabloghezziblue@gmail.com

EDUCATION

University of Massachusetts Amherst **Amherst, MA**
M.S. in Computer Science | GPA 3.83 **Graduated February 2026**
Relevant coursework: Robotics, Advanced Natural Language Processing, Computer Architecture, Theory and Practice of Cryptography, Computational Biology and Bioinformatics

University of Massachusetts Amherst **Amherst, MA**
B.S. in Computer Science | GPA 3.91 | Cum Laude **Graduated January 2025**
Relevant coursework: Machine Learning, Artificial Intelligence, Reasoning Under Uncertainty, Introduction to Algorithms, Computer Systems Principles, Applied Cryptography, Combinatorics and Graph Theory, Game Programming
Achievements: Dean's List every fall and spring semester

RESEARCH EXPERIENCE

UMass Amherst Human-Centered Robotics Lab **Amherst, MA**
Research Assistant **June 2025 – Present**
- Built a lightweight PyTorch framework for hot-swapping LoRA adapters at runtime inside TorchScript/JIT-compiled models, enabling switching locomotion skills with low overhead.
- Developed and evaluated lightweight terrain-based routing that composes frozen visual locomotion specialists for a quadruped through a supervised terrain classifier, with no additional locomotion-policy optimization, leading to greater success than distilled
- Collaborate with Shauna Choi (PhD student) on flow co-policy for high-level robot control.

WORK EXPERIENCE

Silabuz **Lima, Peru**
Software Engineering Intern **December 2023 – January 2024**
- Developed and maintained an API, updating it to meet current requirements.
- Replaced web scraping with official service APIs, making the software more reliable.
- Containerized the application with Docker so all team members could develop and deploy consistently across environments.

Pedro Baumann **Lima, Peru**
Developer Recruitment Consultancy, **Freelancer** **June 2021 – July 2021**
- Built a large dataset for a software company's recruitment process and tools to easily generate large models.
- Reviewed software solutions submitted by candidates.

ADDITIONAL INFORMATION

Publications:
- O. Youngquist, P. Ghezzi, and H. Zhang. "Route or Distill? Rethinking Visual Skill Integration for Multi-Terrain Quadruped Locomotion." *Submitted, September 2026 (submitted to ICRA, under review).*

Languages: Python, C/C++, Java, JavaScript
Frameworks: Flask, PyTorch, Unitree, Isaac Sim, Genesis
Tools: Git, Linux, Docker
Spoken languages: English and Spanish (fully bilingual); Japanese (beginner)
Robotics: Quadruped Robots, Legged Locomotion, Depth-Based Perception, Policy Distillation
